

Where well symbol information is sourced from publicly available "open file" data, it has been provided by Geoscience Australia from Well Completion Reports. These symbols were generated from open file data as at 31 March 2009. Where well symbol information is not publicly available from titleholders' data, the information has been extracted from other public sources. Field outlines are provided by GPInfo, an Encom Petroleum Information Pty Ltd product. Field outlines in GPInfo are sourced, where possible, from the operators of the fields only. Outlines are updated at irregular intervals but with at least one major update per year.

Field outline for Abadi is sourced from IHS Energy, 2006.

Figure 2. Regional structural elements, northeastern Bonaparte Basin (after West and Passmore, 1994), showing locations of Figures 4 and 5.
